

## Hanging instruction

**Preparation:** Only use rolls of the same batch. Before hanging verify that the wallpaper does not have any defects. For testing you have to roll out the wallpaper on a flat and clean underground. Check this high class wallpaper very accurate to prevent complaints. Claims after hanging will not be accepted!

**Surface pre-treatment:** The surface has to be dry, sustainable, flat, clean, constant absorbent and color neutral. Old wallpapers have to be removed completely! Rough undergrounds, holes and unevenness have to be glazed and closed. For leveling the absorption and if applicable to compress the on-wall surface you have to use a water-based primer. Since a successful hanging result is only possible on a neutral colored underground use a rolled maculation or colored primer. In case of a non-absorbent underground we advise to hang a non-woven lining material before you install the wallpaper. On this underground you can hang (as explained below) your wallpaper.

**Paste:** We advise to use special paste for non-woven wallpaper. Our product has been proofed with "Metylan direct control" produced by HENKEL, Germany. The non-woven wallpaper can be applied by using the paste the wall technique (apply paste directly onto the wall and then hang the wallpaper on pasted wall, butt joint) without any soaking time. The paste should be applied with a special roll and it should cover a little more than the size of the wallpaper length.

**Attention:** Remove any excess paste with a damp sponge immediately. Otherwise it is possible that you can see leavings of the glue after it dried.

**Hanging the wall covering:** To apply our wallpaper to the wall, you have to follow the numerical order shown on the product. Ideally start installing the wallpaper with the layer on top from the left side of the wall. The wallpaper should be installed vertically (using a spirit level or similar) from the top to the bottom and from inside to outside inlaid. Press the wallpaper onto the wall, butt joint, using a foam rubber roller a clean soft clammy cloth and remove any air bubbles.

**Cut off leftover:** You have to away assault blend accurate with a cut ruler und a cutter knife direct on the wall.

**Caution:** Please do not use brushes or any plastic rollers. The wallpaper can be damaged by solid hitting or pulling. We cannot give any warranty for form stability and damages of the material if case of using wallpaper pasting machines. Also in course of drying, overly intense heating and/or draughts seams might open up.

**How do I get the wallpaper off the wall?** Our wallpapers are dry-strippable if the pre-handling of the surface has been followed. You can dispose old wall covering or cutting rests in your residual waste or with the "household waste similar industry drop-off".

**For hanging our wallpaper you need the following:** Non-woven wallpaper paste, a bucket, a stirring staff, a sharp cutting knife, a cutting ruler, a water-level / a plumb-line, a pencil, a glue roller / a glue brush, a soft clean cloth, a sponge and a ladder.

**Advice:** The above mentioned indications are meant as general recommendations. No liability is assumed for conditions outside our influences such as working conditions, condition and character of the surface. In case of doubt we advise adequate self-attempts, before starting the hanging job.

We wish you a lot of pleasure with your new wallpaper.
